## 1.0 Introduction

This Public Sector Investment Programme (PSIP) 2025-2026 to 2029-2030 is the capital development programme of the Government. It sets out a five-year rolling strategic investment plan that are designed to address national policies and priorities aimed at creating wealth, building assets, addressing climate change, facilitating employment, enhancing human capital, and protecting the vulnerable, amongst others.

### 1.1 Composition of the PSIP

The PSIP comprises projects and programmes that are ongoing as well as new projects/programmes that are planned for implementation over the next 5 years.

The first year of the PSIP, i.e. FY 2025-2026, includes projects/programmes for which implementation has been firmly decided and for which the cost estimates are established. The subsequent years are indicative for both the estimates of costs and the list of projects included. The annual costs of ongoing projects and the list of new projects will be re-examined and reviewed when preparing the next PSIP.

This document also provides an indicative list of projects/programmes for which preparatory works are expected to start. These projects/programmes are planned to subsequently enter the PSIP for execution, to be financed from Government sources, State-Owned Enterprises or with private sector participation under the Public-Private Partnership (PPP) mechanism.

Preparatory works include feasibility studies, geotechnical investigations, design and preparation of bid documents, amongst others. Funding for that purpose is earmarked under ‘Centrally Managed Initiatives of Government’.

### 1.2 Coverage

The PSIP covers capital projects and programmes that are financed from –

- (a) the Consolidated Fund;
- (b) Special Funds, set up under the Finance and Audit Act; and
- (c) State-Owned Enterprises’ (SOEs) own funds.

These projects and programmes are executed by public sector bodies comprising –

- (a) Ministries, Departments and Parastatal Bodies;
- (b) Local Authorities;
- (c) Rodrigues Regional Assembly; and
- (d) State-Owned Enterprises (SOEs).

### 1.3 Definition of Capital Project included in the PSIP

‘Capital project’ refers to a project or programme that is undertaken to:

- (a) acquire a new fixed asset – through purchase, construction, or otherwise;
- (b) upgrade or improve an existing fixed asset – through renovation or expansion;
- (c) replace an existing fixed asset; or
- (d) implement a programme to acquire, upgrade or replace an asset or group of fixed assets.

For the purposes of the definition of a capital project, ‘fixed assets’ include –

- (a) immovable assets such as land, building, infrastructure (roads, bridges, etc.), utility facilities (energy, water, sewerage, drains, etc.) and other capital facilities/amenities;
- (b) machinery and equipment;
- (c) intangible assets, such as software; or
- (d) a combination of the above that are required by the public body to provide services or goods, in furtherance of its objectives.

### 1.4 Role and Function of the PSIP

Projects/programmes under the PSIP is compiled by the Public Sector Investment Programme Unit (PSIP Unit) of the Ministry of Finance in consultation with other Units within the Ministry of Finance and other line ministries and public sector bodies.

This compilation of capital projects/programmes is based on a number of elements that an efficient public system should feature across the different stages of a project life cycle. These elements are –

- (a) investment planning;
- (b) appraisal and project selection;
- (c) multi-annual budgeting of capital expenditure;
- (d) monitoring and implementation; and
- (e) ex-post reviews and asset register.

Improving the quality of public investment management will be a priority for coming five years. Adequate processes are being put in place to ensure an integrated approach to public investment management that address all stages of the project life cycle as follows –

- (a) for an efficient medium-term investment planning, the Public Investment Management Unit (PIMU) of the Ministry of Finance assesses the strategic relevance of projects proposals taking into consideration Government vision and programme for the next five years, in particular, public sector bodies’ operational plans containing information on clear deliverables and realistic costings, amongst others;
- (b) the appraisal and selection of projects is done centrally by the PIMU, which entrenches the element of medium-term planning in the process.
- (c) budgeting of public investment is made on a medium-term basis, which strengthens the link and consistency with the multi-annual lifetime of investment projects. Moreover, multi-annual budgeting provides an indication of the fiscal space to become available in the medium-term for new projects. For this purpose, the PSIP contains a list of “Projects Under Preparation” that will integrate the investment plan in the future years, once they are ready for implementation;

- (d) monitoring of implementation of the PSIP serves at least two main purposes. First, it can facilitate efficient capital allocation and, second, it can identify potential problems early on for remedial action. The PSIP Unit is responsible for the collection and compilation of information on implementation of projects and to report thereon. The reporting is based on compliance with agreed implementation plans including key cost information, timelines, milestones and key deliverables; and
- (e) one function of the Project Monitoring and Contract Administration Unit (PMCA) of the Ministry of Finance is to identify risks of projects going off-track from the monitoring reports and suggest actions for redress. The PMCA also reviews Project Completion Reports to identify lessons learnt and mistakes to be avoided for future projects. The final step once a project is completed is registering the asset in the Government Asset Register.

The PSIP also serves as an important document for potential investors and other providers in the supply chain on upcoming Government investment plan in terms of pipeline of new projects/programmes as well as projects/programmes under preparation. This will help the Government and Private sector to organize their resources accordingly.

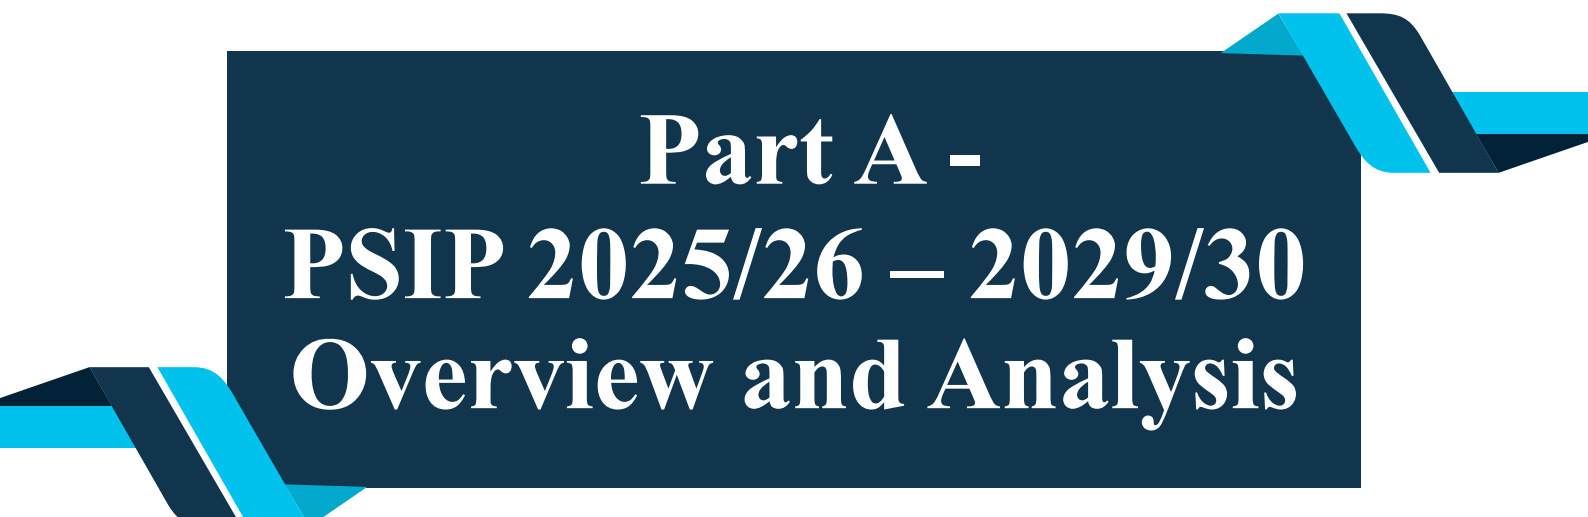

## 1.5 Structure of the PSIP Document

The PSIP document is structured as follows –

**Part A:** Provides an overview and analysis of the five-year PSIP 2025-2026 to 2029-2030;

**Part B:** Provides the list of projects and programmes that are financed from the Consolidated Fund, Special Funds and SOEs' own funds.

**Part C:** Provides the list of projects under Preparation

The main sources of financing with respect to Special Funds will be the the Climate and Sustainability Fund and the Projects Development Fund. In the context of the Public Bodies Financial Sustainability Programme , the Special Funds are being rationalised. The National Environment Fund will be closed and its projects will be financed under the Climate and Sustainability Fund. The Projects Development Fund and National Resilience Fund will eventually be closed with the completion of the existing projects and schemes. The Climate and Sustainability Fund will continue to finance climate change adaption and mitigation projects and programmes.

## 2.7 Projects in the Pipeline

The pipeline of projects include –

- (a) new projects that are included in the PSIP and that are planned to start in FY 2025-2026 and in subsequent years; and
- (b) projects that have passed the preliminary appraisal process and are listed as “Projects Under Preparation” at **Part C**.

## 2.8 Appraisal and Selection of Projects

Project appraisal and selection is undertaken at the level of the Project Investment Management Unit (PIMU) of the Ministry of Finance.

New projects included in the pipeline have been prioritised based on their alignment with Government policy and strategic focus, economic and financial efficiency, risks and environmental/climate change criteria.

The appraisal and selection of capital projects proposals is carried out using the Five Case Model, which is a framework developed by HM Treasury on behalf of the UK Government. In 2018, the G20 adopted the Five Case Model as an international best practice methodology for infrastructure projects delivery, particularly in the public sector.

The Five Case Model comprises these important dimensions –

1. **Strategic case**, which examines the rationale for the proposed investment and the case for change at the strategic level;
2. **Economic case**, which assesses the economic costs and benefits of the proposal to society as a whole, over the lifespan of the project including consideration of alternative options for achieving the desired objective;
3. **Commercial case**, which examines procurement requirements and assesses the implementing bodies’ readiness for prompt project delivery;
4. **Financial case**, which looks at affordability and sources of funding over the lifespan of the project, including any contingent liabilities; and
5. **Management case**, which assesses adequacy of project management responsibilities with clear milestones, governance and reporting arrangements.

In addition, sustainability aspects of a project (including impact of climate change and other environmental issues) as well as its resilience to risk and inclusiveness are taken into consideration while appraising project proposals.

New projects which satisfy the above-mentioned criteria are included in the PSIP, which ensures that projects are strategically aligned, achieve value for money, are commercially and financially viable, and achievable.

Projects that are still at an early stage of development but are considered worth further investigation and preparation are kept in the “Projects under Preparation” list. Funds for preparatory works are under the “Centrally Managed Initiatives of Government”.

The list of projects under preparation is at **Part C**.

## 2.9 Private Participation in Public Projects

Government is having recourse to alternative financing options including private funding for the implementation of public projects. In addition to project finance, private sector also contributes to efficiency and innovation in the implementation of projects. Public projects may be implemented by the private sector subject to certain criteria such as a fair sharing of risks, affordability to the Government and value for money. The BOT Projects Unit of the Ministry of Finance has identified a list of projects which are under consideration:

Table 7: List of PPP Projects

SN	Project
	<b>Industry</b>
1	<u>Academy of Design and Innovation (ADI) Eco Campus</u> The project consists of the design of a purpose-built campus of gross floor area of 37,962 sq mts, with green concepts that will facilitate the organisation and planning of course deliveries while meeting local and international norms. The building will also include a hostel with 603 beds.
	<b>Education and Training</b>
2	<u>Construction of Technical Education Centre at Ebène (ex- Sir Rampersad Neerunjun Training Centre)</u> The project comprises the (i) relocation of the training equipment, tools and furniture of Sir Rampersad Neerunjun Training Centre (ii) demolition of the existing building infrastructure (iii) construction of a new state-of-art education centre with a new administrative block, modern workshops, classrooms, IT labs, a lecture theatre, a resource centre, a canteen and accompanying facilities, and (iv) construction of a building to house the Headquarters of Institute of Technical Education and Technology.
3	<u>Construction of a Hall of Residence for the University of Mauritius at Réduit</u> The project consists of the setting up of a Hall of Residence at the University of Mauritius (UoM), Réduit, on a BOT mode. This project will comprise a total of 114-room facility, which will consist of 90 student rooms and 24 visitors' rooms. the Hall of Residence will be constructed on a site of an extent of 10,994 metre square (Approx. 2.7 acres) at the UoM Farm at Réduit.
4	<u>Revamping of Professional Drivers Training Centre at Forest Side</u> The project consists of revamping the existing Professional Drivers Training Centre into a Modern Driver Training and Education Centre. This comprises of renovation of the existing building, provision of specialised equipment such as simulators and construction of an advanced track, which includes Crossing Junction, Skid Patch, Obstruction Area, Wet Section, Uphill Gradient Section and Braking and Slalom Section.
	<b>Water &amp; Wastewater</b>
5	<u>New Roche Bois Pumping Station and Baie du Tombeau Wastewater Treatment Plant</u> The project consists of upgrading of the existing Roche Bois pumping station and construction of a Wastewater Treatment Plant at Baie du Tombeau.
6	<u>Upgrading of La Nicoliere Water Treatment Plant</u> Rehabilitation and extension of the treatment capacity of La Nicoliere Water Treatment Plant from 66,000 m <sup>3</sup> per day to 100,000 m <sup>3</sup> per day.
	<b>Energy Self-Sufficiency</b>
7	<u>Implementation of a Solar PV System at St Martin Wastewater Treatment Plant</u> The Wastewater Management Authority intends to undertake the project under a PPP model which will involve the development and operation of a 9 MW Solar Photovoltaic System at St Martin Wastewater Treatment Plant. It will include the setting up of a solar farm with all amenities and interconnections with CEB grid . The objective of the project is to contribute to our national objectives of substituting our energy generation by renewable technologies.
	<b>Solid Waste Management</b>
8	<u>Integrated Waste Processing Facility</u> This project consists of sorting, composting and recycling of household waste. The objectives of the project include the following: (a) diversion of a sizable portion of the recyclable waste component from Mare Chicose Landfill to the two new plants located at Laventure and La Chaumiere; and (b) promoting the circular economy through use of recovered materials from waste.
	<b>Road and Land Transport</b>
9	<u>Fleet Management System</u>

SN	Project
	The Fleet Management System would provide for a tracking system to monitor vehicle operation to keep the fleet running efficiently and on time and to allow the tracking of buses to ensure that bus operators are adhering to their established time table. The project will also provide a Passenger Information System (PIS) designed to provide real-time bus travel information to passengers before, during, and after their journey.

## 2.10 Project Implementation and Monitoring

The Project Management and Contract Administration (PMCA) Unit of the Ministry of Finance has the mandate to ensure that projects are implemented in a timely manner, within approved costs and meet the intended outcomes as well as to provide advice to public bodies in respect of project management and contract administration.

The functions of Project Management and Contract Administration are to:

- (a) formulate policies and issue instructions, directives, procedures, circulars, technical notes and manuals relating to project management and contract administration;
- (b) designate a public officer to assist a public body with project management and contract administration;
- (c) oversee project implementation by public bodies and, where appropriate, give necessary advice and instructions to ensure seamless implementation;
- (d) prepare a post-implementation report of every completed project;
- (e) maintain a database of experienced and competent project managers whose services may be hired by public bodies;
- (f) organise, conduct or arrange for appropriate training programmes for public officers involved in project implementation; and
- (g) liaise and collaborate with international organisations to improve project management and contract administration.

The PMCA will designate Project Coordinators in identified Ministries to assist in project implementation and contract administration. In addition, PMCA will carry out capacity building programmes for public officers to improve their project management skills and contract administration.

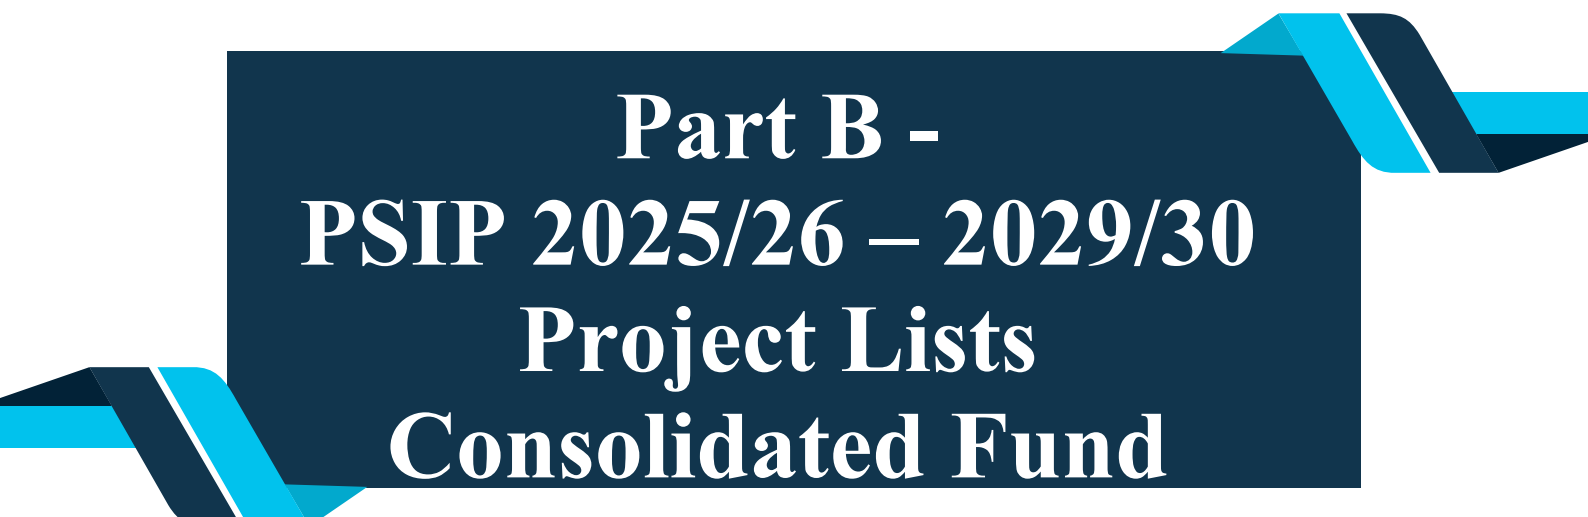

The PMCA will also identify early signs of projects going off-track with a view to addressing same through appropriate corrective actions.

The dynamic National Schedule of Rate and National Analysis of Rates will become operational before the end of 2025. This will enable more accurate project cost estimates, thus avoiding bids received being financially unresponsive and re-tendering with cost increases.

## **Annexure to Climate and Sustainability Fund:**

### **Construction and upgrading of drainage infrastructure**

**Notes:**

The list of drain infrastructure projects has been compiled from information obtained from Implementing Agencies and from the approved National Flood Management Programme (NFMP).

Projects which are completed and for which the final payments have already been effected prior to the financial year 2024/25 have been excluded from the list of projects presented.

The project values of projects have been maintained as approved in the NFMP, and have only been adjusted downwards where the contract values and planned expenditure, as obtained from Implementing Agencies, are lower than the approved project values.

The figures presented may not add up to the total due to rounding.
